A 1 User information

A 1.1 Meaning of the pictograms

 Situations where failure to follow the instructions may lead to danger, damage to material or operating faults.

 Important information for operator and engineer.

 Automatic mode
Automatic sequence

 Close, screw in, fasten, etc.

 Open, release, loosen

 + more, higher

 - less, lower

 Continuous operation

 Time, time sequence

 Disconnect mains plug

A 1.2 Important information

 *The instructions for use should be read by the user before starting up the unit for the first time, in order to avoid incorrect operation and other damage. If other language versions are required, please request these from your responsible KaVo agent. Duplication and distribution of the instructions for use (IU) require KaVo's prior consent.*

All technical data, information and properties of the product described in the IU correspond to the state on going to press.

Modifications and improvements to the product as a result of new technical developments are possible.

This does not imply any right to retrofitting of existing units.

KaVo assumes no responsibility for damage arising through:

- external influences (poor quality of the media or inadequate installation)
- use of incorrect information
- improper use
- improperly performed repairs.

Repair and maintenance work - apart from the activities described in these instructions for use - may be performed only by qualified technical personnel.

In the event of modifications by third parties, the approvals become null and void. KaVo recommends using only original spare parts for operation and for repair.

A 1.3 Precautions

Safe operation and protection of the unit are ensured only through proper use in accordance with the instructions for use and using the tools approved for the purpose. The following should also be observed:

- the tool manufacturer's instructions,
- the work safety regulations,
- the accident prevention regulations.

■ *Each time before switching on, check the set speed.*

■ *Observe the permissible maximum speed and maximum pressure of the tools (according to tool manufacturer's instructions).*

■ *Use safety screens when working with rotating tools.*

■ *To avoid danger through accidental switching on, place the handpiece on a suitable shelf or tool support.*

4060/4062.

In the event of an unsatisfactory condition of the unit or improper use, e.g.:

- unsuitable tools
- tool shafts not manufactured according to DIN-ISO
- improper use or use not in accordance with the purpose
- unapproved speeds for tools used
- incorrect clamping of the tools in the chuck
- insufficient retaining force of the chuck (wear, soiling, failure to follow the product care instructions for the chuck system, etc.)
- different sizes of tool shaft and chuck
- lack of regular cleaning of the chuck
- failure to follow the maintenance instructions
- failure to comply with the accident prevention regulations (e.g. failure to use safety screens, safety devices, handpiece supports, etc.)
- Non-conformity with the EMW Guidelines regarding radiation from low frequency, radio frequency and microwaves (use shielded cable)
- failure to take into account signs of wear and damage
- tool shafts which have slipped out (potential danger = bending of the tool shafts)

there is a danger of injury and damage to material and unit, e.g. due to:

- Bending of the tool shafts
- Accidental withdrawal of the tools from the chuck
- Breaking or splintering of the tool.

- Eccentric rotation or shattering of tools, or
- Snagging and rolling up
- Catapulting of small material-parts

4060/4062.

A 1.4 Possible uses and applications

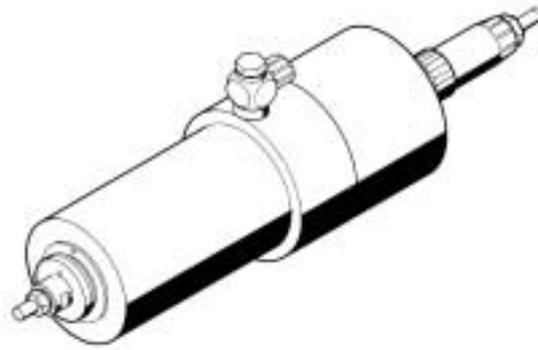

The motorised spindle is designed to be used in machines for filing processes, such as drilling, milling, cutting etc.

A 2 Scope of delivery - Accessories

A 2.1 Scope of delivery

Check to make sure delivery is complete:

- 1 HF Motor-spindle EWL 4060 or 4062 with connecting cable 1,5 m
- 1 Ratchet spanner of 10 mm
Mat.No. 0.411.5232
- 1 Fork spanner of 13 mm
Mat.No. 308.0313
- 1 Set of brushes Mat.No.. 0.411.0190
- 1 Test pin Mat.No.. 0.240.2308
- 1 Chuck 6 Mat.No.. 0.675.1482
- Operating instructions 0.488.5895

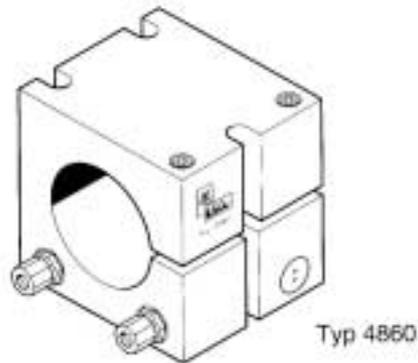

A 2.2 Accessory

For external air or water cooling:

Chucking device 4860 for \varnothing 60mm
(only for HF Motor-spindle EWL 4060)

HF Motor-spindle EWL 4060 \varnothing 60mm
HF Motor-spindle EWL 4062 \varnothing 61,91mm

A 3 Electrical connection

Check that voltage and frequency match the data given for the HF-converter.

4060/4062.

A 4 Fitting and commencing operation of HF Motor-spindle EWL 4060 or 4062

The spindle is designed for cooling via the spindle support.

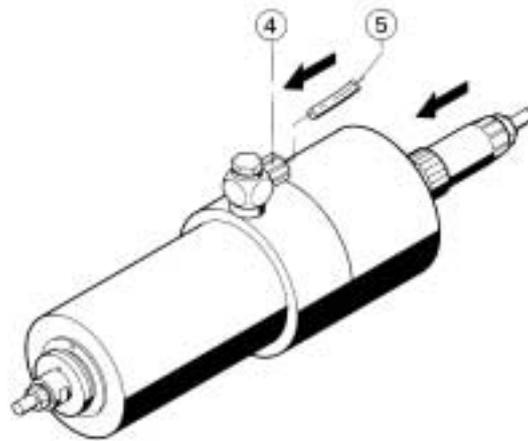

Fit the compressed air hose ⑤ $d_1 = 4 \text{ mm}$, $D_2 = 6 \text{ mm}$ in the direction of the arrow to the air control connection ④ and connect up.

The input of compressed air from min. 0,5 bar to max. 1 bar (min. 7 to max. 14 psi) must be dry and dustfree. It must not contain any foreign bodies or lubricants.

 Use only compressed air free from dirt, water and oil!

The HF-Motor spindle EWL 4060 and/or EWL 4062 is sealed up against penetration of dirt and coolant but must not be flooded with coolant or lubricant.

Operation is possible in all working positions both horizontal and vertical (tool showing down), with cooling through the spindle support or external cooling sheath.

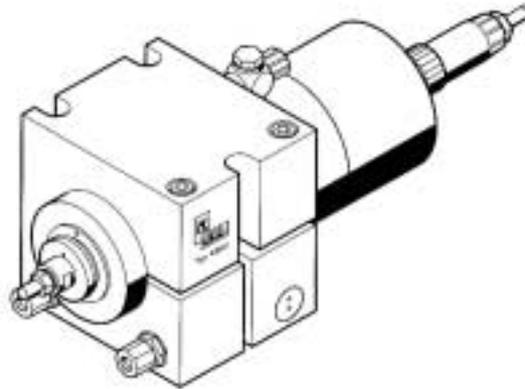

4060/4062.

When mounting the spindle pay attention to a completely cylindrical seating.

The spindle can be clamped over its whole casing length. It is recommended to clamp a large surface, and if possible in the middle of the spindle.

The HF Motor-Spindle EWL 4060 and/or 4062 is protected against spray water, but must not be plunged.

 *Spindles must only be mounted and operated in appropriate receptacles and machines, according to the application possibilities of the spindle.*

 *The spindles have to be connected to ground.*

 *Please apply no violence at all.*

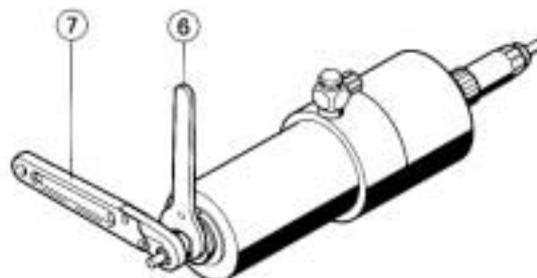

Mind the direction of rotation (see arrow on the rating plate).

Operate the HF Motor-Spindle EWL 4060 and 4062 only with a tool or test pin fitted. It is essential not to subject the fitted tool to jolts or impacts.

 *Use only tools free of unbalance.*

- *Regulations for the prevention of accidents are to be observed!*
- *Permitted max. speed, forward feed and further specific instructions indicated by the manufacturer are to be observed.*
- *Any liability shall be excluded if defects or the consequences thereof are due to manipulation or modification to the product by the customer or by any third parties not authorized by KaVo EWL.*

4060/4062.

A 5 Changing tools/chucks

⚠ Tools and/or chucks must be changed (with 1 Fork spanner of 13 mm 6 and 1 ratchet spanner of 10 mm 7) only when the HF Motor-spindle EWL 4060 and/or 4062 is at a complete standstill. HF-converters must be made safe against accidental switching on, e.g. by pressing the power switch to "OFF".

A 5.1 Removing the chuck

Hold rotor 3 with spanner of 13 mm 6 and turn chuck 2 with ratchet spanner of 10 mm 7 in the direction of the arrow until chuck 2 can be removed towards the front.

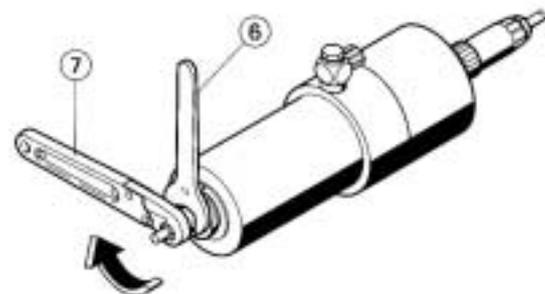

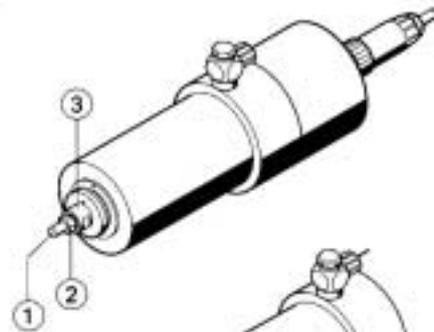

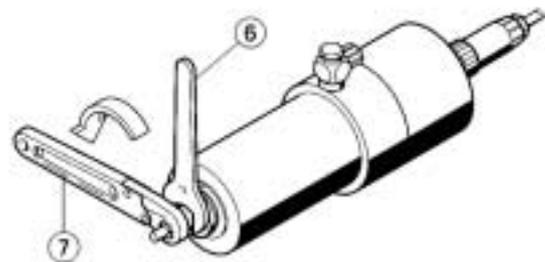

A 5.2 Inserting the chuck

Insert new chuck 2 with tool or test pin 1 inserted in the chuck holder.

Hold rotor 3 with spanner of 13 mm 6 and tighten the chuck 2 with ratchet spanner of 10 mm 7 in the direction of the arrow and thereby secure the tool or test pin 1 respectively.

When changing the tool, fix rotor 3 with spanner of 13 mm 6 and unscrew chuck 2 with ratchet spanner of 10 mm 7 in the direction of the arrow and remove until test pin 1 or the so far used tool can be removed towards the front.

Slide in new tool into chuck 2 so far as it will go. Fix rotor 3 with spanner of 13 mm 6 and screw up chuck 2 with ratchet spanner of 10 mm 7 in the direction of the arrow and thereby secure the tool.

4060/4062.

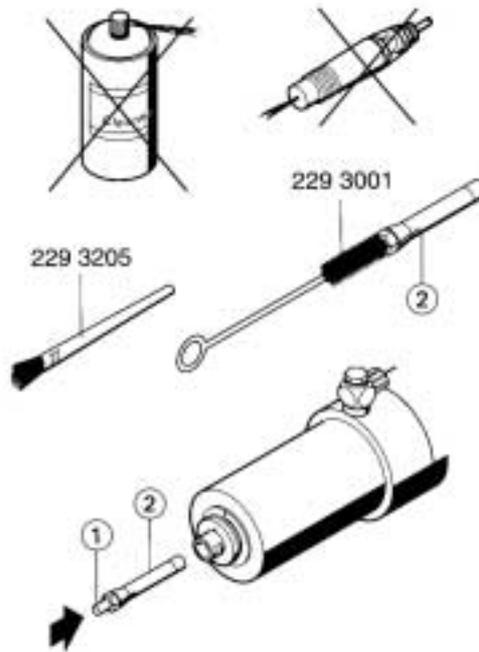

A 6 Maintenance

 On no account clean the HF Motor-spindle EWL 4060 and/or 4062 with ultrasound, steam jet, compressed air, etc. Under no circumstances should detergents like e.g. spray purifier, fat solvents, etc. get into the inside of the HF Motor-spindle EWL 4060 and/or 4062.

Clean the chuck ② regularly.

Clean chuck holder and chuck ② with an artist's brush or similar. Apply a light film of oil to the chuck.

Reinsert the clean chuck ② with tool or test pin ① in HF Motor-spindle EWL 4060 or 4062.

A 7 Technical data

for HF Motor-Spindle EWL 4060 and/or 4062 relate to operation with HF-Converter 4450:

Special steel case \varnothing 61,9 mm or 60 mm

Frequency 84 - 833 Hz

Idling speed 5,000 - 50,000 min⁻¹

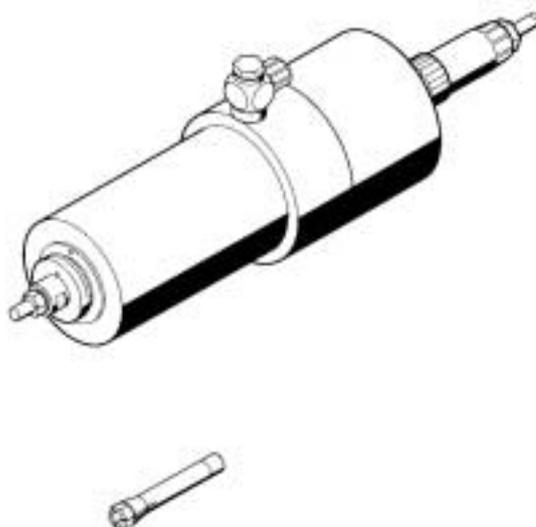

Torque max. 50 Ncm

Peak power max. 1,2 KW

Voltage max. 220 V

Current max. 7 A

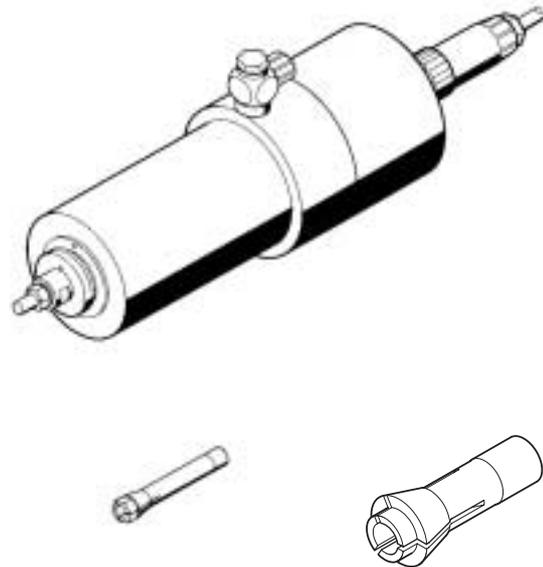

Weight (incl. connecting cable 1.5 m)
3.5 kg (4060)
or 3.6 kg (4062)

4060/4062.

Standard Chucks*

Water cooling through EWL chucking device type 4860

Load limits
HF-Motorspindle EWL 4060 and EWL 4062:

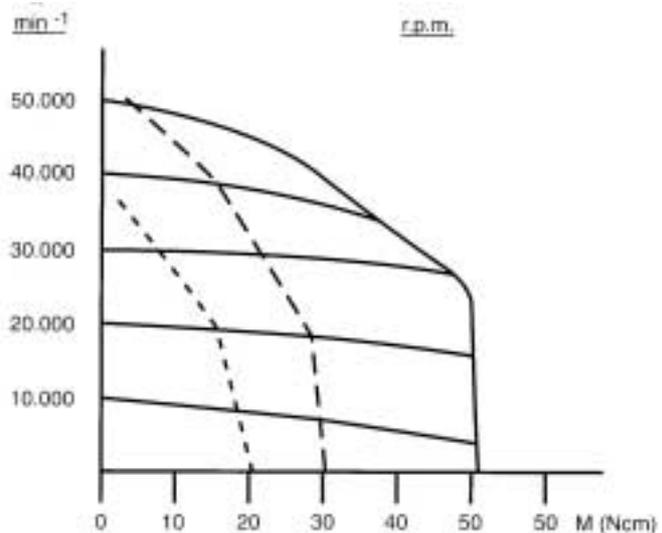

Operating mode: S1
Chucking device: 0.624.2570
Converter: type 4450

The chucking device contains the water cooling circulation:

Flow temperature: 12°C
Flow: ~ 0,8 l / min

----- Wasserkühlung

----- ohne Kühlung

Werte stimmen nur für den oben beschriebenen Aufbau.

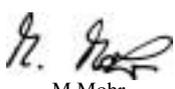

4060/4062.

Guarantee conditions

Under the valid KaVo EWL delivery and payment conditions, KaVo EWL gives a guarantee of satisfactory function and freedom from faults in material and manufacture for the duration of 6 months from the date of sale certified by the vendor. After expiry of the warranty, KaVo gives a guarantee of another 6 months for damage attributable to deficiencies in the material or in manufacture.

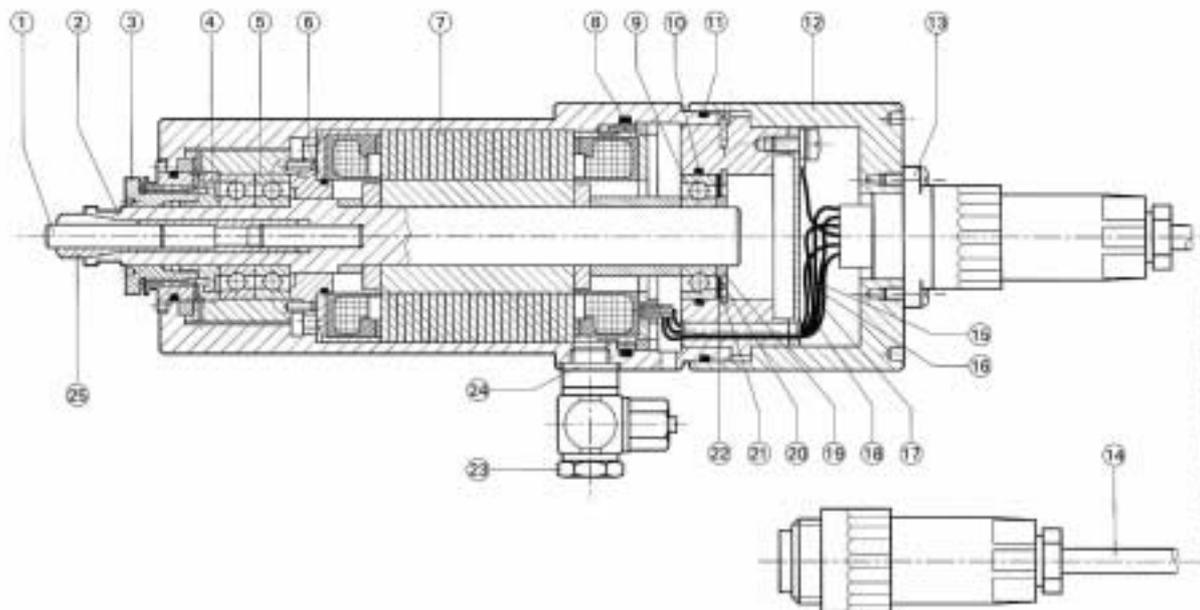

In the case of justifiable complaints, KaVo EWL shall supply spare parts or carry out repairs free of charge. KaVo EWL accepts no liability for defects and their consequences which have arisen or could have arisen as a result of natural wear, improper handling, cleaning or maintenance, noncompliance with the maintenance, operating and connecting instructions, corrosion, impurities in the air supply or chemical or electrical influences which are unusual or not admissible in accordance with KaVo's instructions. The guarantee shall become null and void if defects or their consequences can be attributed to interventions in or modifications to the product. Guarantee claims can only be validated if they are notified immediately in writing to KaVo EWL.

When the product is sent in, it must be accompanied by a copy of an invoice or delivery note which clearly shows the fabrication number.
